SUMMARY

Iam an enthusiastic and detail-oriented MCA student with vast experience in software development and programming. Iam proficient in Python, and PHP, and I have hands-on experience designing online applications and managing databases. Iam passionate about technology and want to apply my talents in a competitive environment where I can contribute to innovative initiatives while also growing as a professional.

PROJECTS

Web-Application : " Hostel Management System(HTML,CSS,Javscript,Php)" This Online Hostel Management System Project in PHP focuses mainly on booking hostels and their management sides. To be more precise, the system helps students to register and book hostel rooms online. Also, the system contains all the students, and room management features with it.

Web-Application: " Home Services (HTML,CSS,Javscript,Php)" – This web application offers a centralized solution where service providers can register and list their services, and users can easily book labourers, request specific services, and communicate with the admin.
